

Maximising customer value with Danfoss DrivePro® Services

When you purchase a Danfoss VLT® Drive, we ensure your satisfaction from the start with our support service available for you *whenever* and *wherever* you need.

As your local DrivePro® partner, we offer you:

Partnership

DrivePro® is all about partnership. We offer services by experienced, dedicated and service-minded professionals that want to see your business thrive.

Value-added services

DrivePro® services are there for you whenever and wherever you need them. We go beyond device maintenance, repairs and replacements to deliver expert services that bring added value to your process and business.

Know-how

DrivePro® experts understand the special characteristics, needs and requirements of your AC drives applications, your industry, your business and you.

Keeping you at the forefront

DrivePro® ensures that all the latest innovations are always made available to you in the form of upgrades or exchanges. Because we understand your application needs, we are confident in making recommendations for the future.

Danfoss DrivePro® Services:

DrivePro® Start-up

DrivePro® Start-Up checks installation, performs test runs and optimizes configuration for the drive at start-up. Includes start-up reporting, user guidance and future recommendations.

DrivePro® Extended Warranty

DrivePro® Extended Warranty extends the standard warranty time for new units.

DrivePro® Upgrade

DrivePro® Upgrade replaces parts or software in a running unit to the latest version. Includes site evaluation, upgrade plan and future recommendations.

DrivePro® Retrofit

DrivePro® Retrofit converts a product which is close to the end-of-life to a new product model. Includes both audit of the installation, planning and delivery of the retrofit kit to the site.

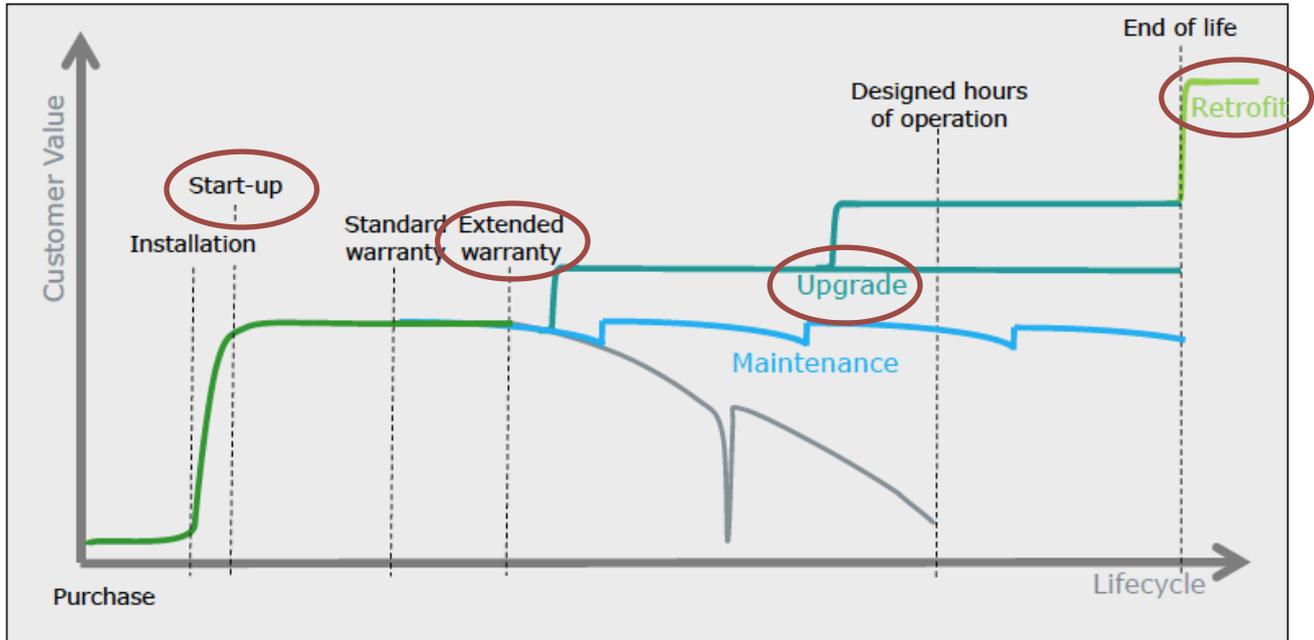

The ultimate goal is to ensure the drive is working at its full potential from the start to ensure maximum availability.

Contact us on 1300 655 952 or sales@controlstore.com.au for more information and / or a free assessment. We're here to help.

The Benefits of DrivePro® in Lifecycle Management

With a Danfoss VLT® Drive, and the bonus of DrivePro® - you'll be well equipped to optimise the lifecycle of the product.

By the right Lifecycle Management the product maintains its value, and it is even possible to increase the value by upgrading. The right Lifecycle Management prevents the effect of external factors to prolong the product lifetime and help find potential problems in advance.

Danfoss & Controlstore - together we offer cost competitive VLT® HVAC Drives

Our partnership with Danfoss has enabled Controlstore to be more responsive to your needs in supplying superior and cost competitive VLT® HVAC Drives. Danfoss VLT® Drives reduce energy consumption, speed up your processes and improve safety and the working environment.
